EDUCATION

Tecnologico de Monterrey

Bachelor of Science in Computer Science

Aug. 2020 – May 2024

Guadalajara, Jalisco

EXPERIENCE

Frontend Engineer

Lizza

Jan. 2023 – Current

Zapopan, Jalisco

- Created the company's turborepo for their next gen version of their product
- Responsible of creating new features to the existing app
- Worked on re-creating the whole app from Vue.js to Next.js
- Main UI Frontend Engineer

Frontend Engineer

Mis Fans

Mar. 2022 – Oct. 2022

Zapopan, Jalisco

- Create new components, layouts, and maintain or update the existing ones
- Build informative pages such as terms and policies, 404, and landing
- Build responsive payment screens, user profile and user dashboard

PROJECTS

Shopper (Lizza) | TypeScript, Next.js, Tailwindcss, Git

Feb. 2023 🍴

- Created the whole UI
- Integrated endpoints to display all the information of the stores and products
- Integrated TikTok like feature on page for sellers to advertise their products
- Developed the layout for the app, made responsive by default and with personalized features
- The Shopper app is Lizza's official storefront and hundreds of people are buying through it

Seller (Lizza) | TypeScript, Next.js, Tailwindcss, Framer Motion, Git

July 2022

- Created most of the UI
- Implemented different shipping methods for sellers to choose from
- Created global notification system
- Made an onboarding process using Framer Motion
- Integrated analytics API with tables to display to the seller
- Implemented all of the animations of the app
- Made the connection between two apps of the same monorepo: POS (See below)
- The Seller app is Lizza's official dashboard and is being used by a lot of sellers in Mexico

POS: Point of Sale (Lizza) | TypeScript, Next.js, Tailwind, Vercel, Turborepo, Git

Jan. 2023 – Jan. 2023

- The project was developed to work as a Micro Frontend inside a Turborepo
- Created a POS to allow a user create a sale and get paid
- The user can get paid face-to-face or share a payment link to the buyer
- The POS can either accept cash or pay with card
- The card option could be processed with PayPal and other services using Primer.io
- The store uses its query parameters in order to properly deliver the money to the correct store
- Developed the whole boilerplate for the project, in a proper and scalable way
- This is being used in production and thousands of transactions are being made today in Mexico

Personal Website | React.js, CSS, Vercel, Git

Sep. 2022 – Oct. 2022 🍴 🌐

- Developed my own personal website to connect my multiple accounts and provide my CV for download.
- Implemented Three.js fiber to create an animated background
- Renders a 3D model on the desktop version which follows the user's cursor
- Developed a mobile friendly experienced, including a mobile landscape orientation layout
- Deployed via Vercel to my domain
- Implemented both Vercel and Google analytics to the page to track views
- Made use of Mixpanel to keep track of the interaction of the user with the website

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Developer Tools: Linux Systems, CLI, Turborepo, Git, Vercel, Supabase

Frameworks & Libraries: Tailwindcss, React.js, Next.js, React Native, Three.js, Framer Motion
